INDEX TO VOLUME XL.

A.

Abbot, J. H., new electro-magnetic instruments, 104.
note on pneumatic paradox, 144.
Actæon, two species of, described, 94.
Adams, C. B., on the mollusca of Middlebury, Vt., 266, 408.
Agricultural survey of R. I., 182.
Agriculture, chemistry of, by Liebig, 177.
Alcohol, action of on alkalies, 216.
American Philos. Soc., proceedings of, 27, 374.
Ammonia, its existence in the atmosphere, 180.
Analysis of alluvium of the Nile, 190.
soils, 189, 198.
Anamitic and Latin Dictionary, notice of, 43.
Antarctic continent, discovery of, 394.
Anthracite coals, analyses of, 373.
Arsenic, how detected in the body, 278.
how counteracted, 292.
Ashes, volcanic, shower of, 198.
Atomic theory, Daubeny's work on, 197.
Aurora Australis, 398.
Borealis, 204, 206.
of May 29, 1840, 48, 337.

B.

Bache, A. D., observations of magnetic dip, 374.
magnetic intensity in Europe, 30.
Barium, extrication of, 293.
Barometer, siphon, temperature of mercury in, 250.
Benedict, F. N., on corrections of siphon barometer, 250.
Bergen, N. J., zeolites found at, 69.
Beryl, new variety of, 401.
Bibliographical notices, 165, 391.
Blumenbach, J. F., death of, 219.
Blunt, E., observations of solar eclipses, 29
Bonnycastle, Chas., insufficiency of Taylor's theorem, 42.
power of fluids in motion, 32.
Boston Journal of Nat. Hist., 196.
Soc. of Nat. Hist., proceedings of, 386.
Botanical herbaria of Europe, 1.
Botany, Hooker's Journal of, 172.
of north part of N. America, 173.
Bourne, A., on glass for optical instruments, 207.
Bourne, W. O., on localities of zeolites, 69.
Bowman, J. E., on fossil infusoria, 174.
Boyé on a perchloric ether, 50, 382.
Brewster, Sir D., on decomposition of glass, 324.
hourly meteorological observations, 321.
rings of polarized light in decomposed glass, 325.
muscæ volitantes, 333.
line of visible direction, 334.
vision with the head inverted, 343.
British Association, proceedings of 10th meeting, 308.
Buccinum, new species of, described, 100.

C.

Calcium, extrication of, 293.
Cancellaria, new species of, described, 99.
Candles, burning, motion of particles in, 148.
Canker worm, parasite of, 211.
Chase, Capt., on volcanoes of Hawaii, 117.
Chemistry, organic, of Liebig, 177.
Chinese writing, nature of, 37.
Coal, anthracite, analyses of, 373.
containing iodine, 217.
Cold-Bokkeveld meteorite, 199.
Colors, inability to distinguish, 54.
Columba migratoria, roosts of, 348.
Comet, Galle's second, notice of, 40.
Comets, new, 207.
tails of, remarks on, 59.
Compass, invention of, 242.
Conchology of Middlebury, Vt., 266.
Condensation of vapor, effects of, 44.
Conus, new species of, described, 103.

D.

Daguerreotype and its applications, 137.
Daubeny on the atomic theory, noticed, 197.
Dead sea, level of, 213.
Deflagration of carburets, phosphurets or cyanides, 303.
Dip, magnetic, in the United States, 85, 149, 374.
Du Pasquier on iodine as a reagent for hydrosulphuric acid, 123.
Du Ponceau on Chinese system of writing, 37.

E.

Earthquakes, 204, 206, 376.
Eclipses, solar, observations of, 29.

Elaterite, 215.
Electricity from steam, 382.
Electro-magnetic instruments, 104.
machines, laws of, 339.
Electrotype, 157.
Embalming, process for, 194.
Endlicher's Genera Plantarum noticed, 174.
Engraved plates copied by galvanism, 157.
Eocene fossil shells from Ala., 92.
Erman on the meteors of August, 53.
Espy's theory of storms, 327.
Ether, perchloric, 50, 382.
European herbaria, account of, 1.
Exploring Expedition, discoveries of, 394.

F.

Fishes, removal of, 405.
Fluids, power of, in motion, 32.
Forbes's report on meteorology, 318.
Forshey on a great mound in Adams co. Miss., 376.
Fossil caoutchouc, 215.
infusoria in England, 174.
remains in North Carolina, 405.
shells from Alabama, 92.

G.

Galle's three comets, 40, 207.
Galvanic casting, 157.
Galvanic deflagrator of the Lowell Institute, 48.
Gannal's process for embalming, 194.
Gaylord, W., on removal of fishes, 405.
theory of tornadoes, 399.
Geological report of Indiana, noticed, 133.
Michigan, 136.
New York, 73.
Ohio, 126.
Glass, decomposition of, 324.
for optical instruments, 207.
Gold in France, 216.
Goode, W. H., on the Daguerreotype, 137.
Gray, Asa, account of botanical works, 165, 391.
C. S. Rafinesque, 221.
notices of European herbaria, 1.
Guillemin on tea plant in Brazil, 167.
Gypsum, mode of its fertilizing land, 180.

H.

Hail, shower of, 346.
Halo around the sun, 25.
Hare, Clark, on perchloric ether, 50, 360.
Hare, R., on changes in atmospheric vapor, 44.
deflagrating apparatus, 303.
extrication of alkalifiable metals, 293.
potassium, 27.
silicon, 28.
Hawaii, volcanoes of, 117.
Hays, Dr., on inability to distinguish colors, 54.
Heat, radiant, Prof. Powell's report on, 313.
of the moon's rays, 315.
Herbaria of Europe, notices of, 1.
Herrick, E. C., meteoric observations, 203.
parasite of Geometra vernata, 211.
star-showers of former times, 349.
Hessian fly, notice of, 381.
Hildreth, S. P., meteorological journal for 1840, 345.
Hooker, W. J., Flora Boreali-Americana, noticed, 173.
Icones Plantarum, noticed, 391.
Journal of Botany, 172.
Horner, W. E., notice of remains of mastodon, 56.
on dental system of mastodon, 377.
Horsefield's Plantæ Javanicæ noticed, 391.
Horticultural experiments, 197.
Hubbard, O. P., notice of geological reports, 73, 126.
Humic acid, 178.
Hydrosulphuric acid, reagent of, 123.

I.

Ice on bottoms of rivers, 407.
India, culture of silk and cotton in, 39.
Indiana, geological survey of, 133.
Infusoria, fossil, in England, 174.
Insects, African, 387.
observations on, 146.
Intensity, magnetic observations on, 31, 56.
Iodine as a reagent for hydrosulphuric acid, 123.
in coal, 217.
Iriscope, 334.
Iron mine hill in Rhode Island, 185.
native and meteoric, 366.

J.

Jackson, C. T., survey of Rhode Island, 182.
Jacobi on electro-magnetic machines, 339.
Johnston, J., new variety of beryl, 401.
Jones's Outline of the animal kingdom, noticed, 196.

K.

Kangaroo, six new species of, 217.
Kelley, E. G., on volcanoes of Hawaii, 117.
King, A. T., account of a solar halo, 25.
Kirtland, J. P., notices in ornithology, 19.
on western fishes, 388.
Klaproth on the invention of the mariner's compass, 242.
Koch, A., collections of remains of mastodons, &c., 56.
Kunze on Caricography, noticed, 174.

L.

Latitudes of several places in the United States, 43.
Lea, H. C., descriptions of fossil shells, 92.
Lea, Isaac, notice of the oolitic formation in America, 41.
new species of Colimacea, 28.
on Patella amœna, 31.
Lea, M. C., analyses of anthracite coal, 373.
on southern coal field of Penn. 370.
Level of the Dead sea, 213.
Liebig on chemistry of agriculture, 177.
Limber, J., fossil remains in N. C., 405.
Linnæus, herbarium of, 2.
Littrow, death of, 220.
Locke, John, observations of magnetic dip, 149.
magnetic intensity, 56.
Longitudes of several places in the United States, 43.
Loomis, E., observations of magnetic dip, 85, 380.
magnetic intensity, 378.
on the storm of Dec. 20, 1836, 34.
Lowell Institute, galvanic deflagrator, 48.

M.

Magnetic dip in the U. S., 85, 149.
intensity in Europe, 30.
U. States, 56, 378.
observations, system of, 48, 335.
Magneto-electric instruments, 104.
Magnetometer, new, 380.
Mariner's compass, invention of, 242.
Mason, E. P., observations on nebulæ, 37.
obituary notice of, 407.
Masonite, a new mineral, 186.
Mastodon bones, notice of, 56.
dental system of, 377.
Mercury, temperature of, in a siphon barometer, 250.
Meteoric iron, analysis of, 369.
observations, 201, 203.
showers of former times, 349.
Meteorite of Cold-Bokkeveld, 199.
Meteors of August, 51, 201.
Meteorological observations, reduction of, 311.
hourly, 321, 322.
inquiries, 402.
notes, 204.
Meteorology, Forbes's report on, 318.
of Perth, 342.
journal for 1840, at Marietta, 345.
Michigan, geological survey of, 136.
Mitchell, Wm., remarks on the tails of comets, 59.
Mitra, three species of, described, 101.
Mohs, F., death of, 220.
Mollusca of Middlebury, Vt., 266.
Monkey, howling, notice of, 387.
Moon, heat of her beams, 315.
Moquin-Tandon's Enumeratio Chenopodearum, noticed, 174.
Morin on meteorology, 402.
Morris, Miss M. H., on the Hessian fly, 381.
Mound, great, in Adams co. Miss., 376.
Muscæ volitantes, cause of, 323.

N.

Natural Hist., Bost. Jour. of, 196.
Society of, 386.
Nebulæ, observations on, 37.
Necrology, 218, 407.
Nelumbium luteum, 390.
New York, geological report of, 73.
Northern antiquaries, society of, 212, 402.
Numbers, interesting properties of, 112.

O.

Observatory erecting near Glasgow, 344.
to be built in Philad., 375.
Ocean, depth of, 407.
Ohio, geological survey of, 126.
Olmsted, D., meteors of November, 202.
Oolitic formation in America, 41.
Organic chemistry by Liebig, noticed, 177.
Ornithology, notices in, 19.
Oxalic ether and chlorine, compound of, 215.

P.

Parasite of eggs of the canker worm, 211.
Parker, Capt., on volcanoes of Hawaii, 117.
Parker, Peter, on volcanic ashes, 198.
Pasithea, three species of, described, 92.
Patterson, Dr., on electricity from steam, 382.
Payen on woody tissue of plants, 176.
Perkins, G. R., on properties of numbers, 112.
Pigeons, roosts of, in Ohio, 348.
Plants, spiritual life of, 170.
Pleurotoma, new species of, described, 98.
Plummer, J. T., horticultural experiments, 197.
observations on insects, 146.
Pneumatic paradox, note on, 144.
Poisson, death of, 220.
Potassium, process for obtaining, 27.
Powell's report on radiant heat, 313.
Preservation of timber, 213.
Proceedings of Am. Phil. Soc., 27, 374.
Bost. Nat. Hist. Soc., 386.

R.

Rafinesque-Schmaltz, C. S., writings of, 221.
Rain, excessive falls of, 326.
Phillips's researches on, 326.
Rhode Island, survey of, 182.

S.

Salisbury, E. E., abstract of Klaproth on the invention of the compass, 242.
Savage, T. S., on African insects, 387.
Scalaria, two species of, described, 95.
Schlechtendal's Linnæa, noticed, 392.
Scientific memoirs, foreign, 308.
Shells, fossil, from Ala., described, 92.
new, described by I. Lea, 28.
of Middlebury, Vt., account of, 266, 408.
Shepard, C. U., on native and meteoric iron, 366.
Shooting stars, list of showers of, 349.
of August and Nov., 51, 201.
Silk, culture of in India, 39.
Silliman, B. Jr., on the electrotype, 157.
analysis of alluvium of the Nile, 190.
Silurian system of rocks in N. Y., 77.
Smith, H. L., observations on nebulæ, 37.
Smith, J. L., detection of arsenic, 278.
Smith, William, death of, 219.
Society of Northern antiquaries, 212, 403.
Soils, analysis of, 189, 198.
Spermaceti, burning, moving particles in, 148.
Spiritual life of plants, 170.
Star-showers of former times, 349.
Stars, nomenclature of, 310.
catalogues of, 310, 312.
missing, 406.
Steam, electricity from, 382.
Steam vessel crossing the Atlantic in 1819, 34.
Stendel's Nomenclator Botanicus, noticed, 174.
Storm of Dec. 20, 1836, account of, 34.
Storms, Espy's theory of, 327.
Stratton, W. T., on ground ice, 407.
Strontium, extrication of, 293.
Subterranean temperature, report on, 332.
Sugar, artificially made, 216.
Sulphuric acid, new process for, 214.
Sun seen of a blue color, 323.

T.

Taberd's Anamitic and Latin dictionary, 43.
Tails of comets, remarks on, 59.
Taylor's theorem, discussion of, 42.
Tea plant in Assam, 165.
Brazil, 167.
Terebra, two species of, described, 100.
Timber, preservation of, 213.
Tornadoes, illustration of, 399.
Triton, new species of, described, 99.
Trochus, " " 96.
Turbinella, " " 98.
Turbo, " " 95.
Turritella, three species of, described, 96.

V.

Vision with the head inverted, 343.
Volcanic ashes, shower of, 198.
Volcanoes of Hawaii, 117.
Voluta, new species of, described, 103.
Von Martius on the spiritual life of plants, 170.

W.

Walker, S. C., on meteors of August, 1840, 51.
Waterspout, illustration of, 399.
rotation of, 324, 332.
Waves, report on, 323.
Wikström's report on botany, 303.
Wind, comparative force of, 322.
Winthrop, John, ancient meteorological notes, 204.
Woody tissue of plants, 176.
Wyman, J., notice of the howling monkey, 387.

Z.

Zeolites, locality of, 69.
